

## Glass Railing Systems

## Company Profile

### About us

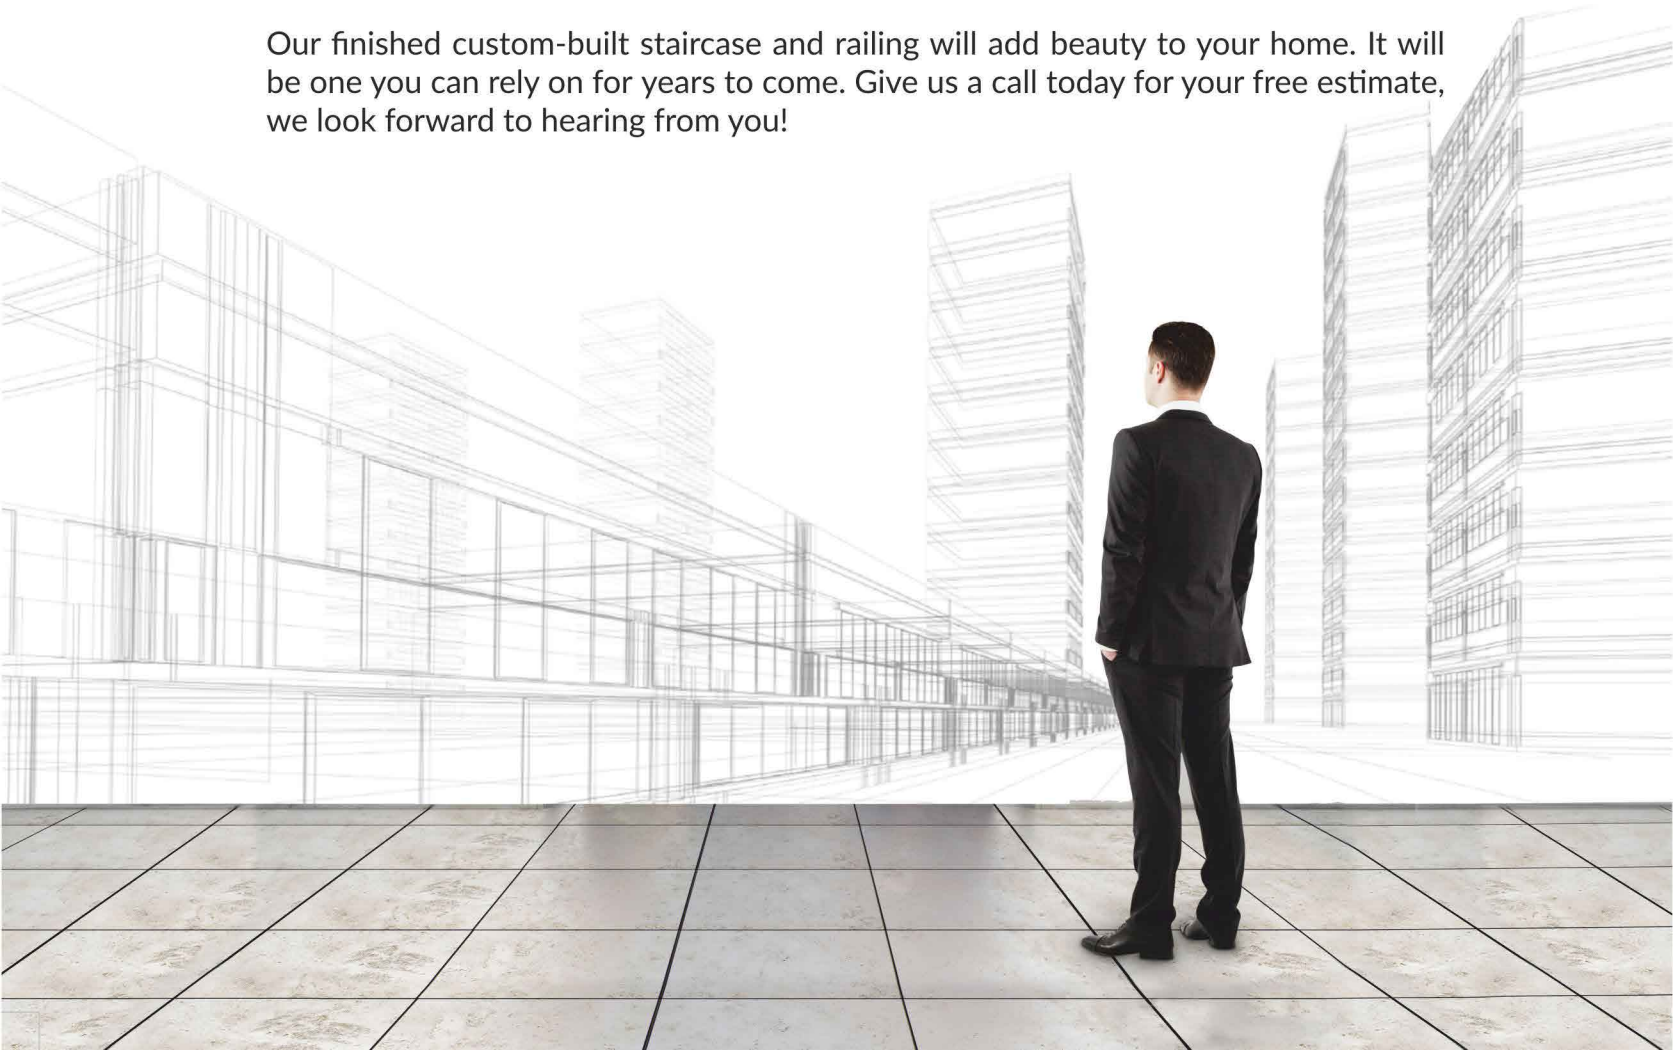

Allmark - Railing and Hardware is one of the leading Railing manufacturers in India. We have been steadily growing and satisfying the architectural building industry for years. Many of our clients are builders, however, we also serve a great percentage of dealer, distributor, private residents as well.

The initial start of your project is first discussed in a “one on one” meeting with you and or your consultant. All the preliminary details and materials needed to complete your exquisite Railing will be discussed during the first consultation. During this time segment, we will define what dimensions are to be specified and also incorporate the design style with the architecture of your building or dwelling before any work begins.

Allmark are Railing specialists that have been providing high quality, custom built staircase and balcony railings since 2013. Mr. Sourav Chokhani the proprietor is involved on with every project. Everything from custom designing, fabrication, installation on stairs and balconies.

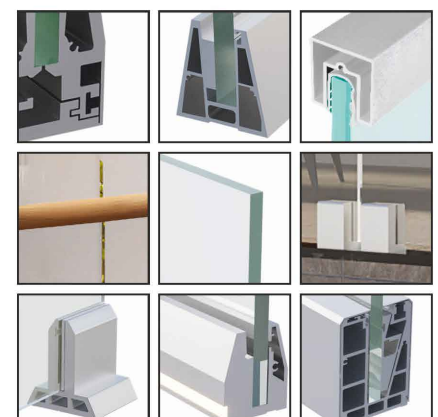

Allmark - Railing and Hardware prides themselves on crafting only high quality products. Every project is individualized with a wide scope of options available with value engineering. We work with numerous types of materials to provide you with a unique product that you can be proud of. Our team consists of skilled craftsmen that are focused on delivering your project on time and on budget while working alongside other professionals such as architects, builders and designers.

Our finished custom-built staircase and railing will add beauty to your home. It will be one you can rely on for years to come. Give us a call today for your free estimate, we look forward to hearing from you!

## Other Products

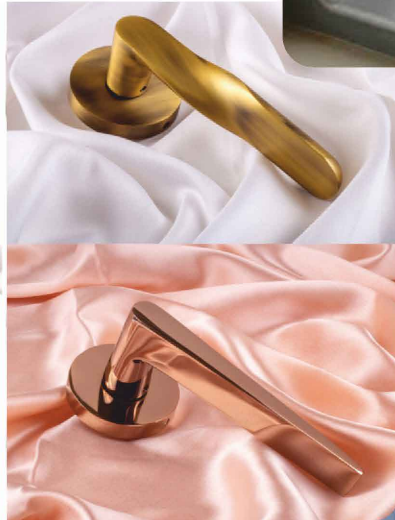

### PVD FINISH

PVD stands for Physical Vapour Deposition. During the PVD coating process, a top layer is applied over the base material of our products by evaporation at temperatures up to 500 degrees Celsius.

### STAINLESS STEEL

304-Grade Stainless Steel may be the best choice for a railing system designed for both indoors and outdoors - especially if your application is away from large bodies of salt water and won't be exposed to extreme conditions.

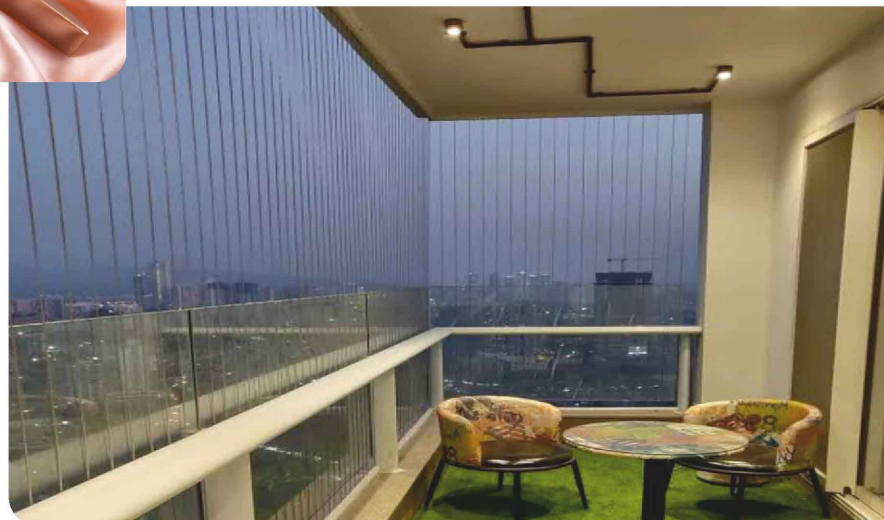

### BRASS MORTICE HANDLE

Brass is durable and resistant to corrosion, making it an attractive option from early on in the door-knob-making process with unique finishing options.

### INVISIBLE GRILL

Invisible Grills are probably the safest window grill options you can buy in the market today. While they may be popular mainly for the fact that they unblock your view, you do not need to compromise your safety.
